Professional Experience

GENIES| AI avatar startup B2C partnered with UMG, Unity, NBPA — Los Angeles CA, In Office

Full Stack Developer — **Jun 2025 - Present 2025**

- Designed, Created & Scaled 2 full stack services used by customers across multiple regions
- Cut asset processing time by **48%** by identifying and resolving cross-service bottlenecks
- Developed internal libraries adopted across teams to standardize monitoring, achieving nearly **100% internal adoption**
- Led multiple SEV-0 recovery efforts and reduced response time by introducing version control to pipeline

IBM | AI and Data — Austin TX, Remote

Full Stack Developer — **Jul 2023 - Aug 2024**

- Worked on the same product collaborating with 4 teams over 1 year delivering 40+ features used by massive enterprise clients
- Slashed bug reproduction time by **85%** by championing and leading the development of a feature to read, store and replay client state and data when reporting a bug
- Reduced backlog of bugs by **70%**

Quality Assurance Intern — **May 2023 - Jul 2023**

- Delivered a testing system **twice as reliable** by rebuilding the 2-year-old end-to-end testing pipeline using Nightwatch on Selenium to automate testing across different browsers
- Developed internal tooling to automate the creation of new end-to-end tests by recording the actions of users on multiple different devices and browsers reducing developer frustration

Projects

INSIGHT | *React, Python/Flask, MongoDB, OpenAI API*

- Enabled **2 local businesses** to reconnect with inactive customers through targeted pain point analysis, driving a 50% increase in 6-month dormant user re-engagement by addressing critical product gaps
- Scraped and analyzed 15,000+ Reddit posts across 20+ subreddits using automated NLP pipeline, processing 3.2M words of user feedback to generate actionable insights stored in MongoDB with 94% sentiment classification accuracy

ASSET AI | *React, JS, HTML5 & CSS3, MongoDB, Node/Express, Heroku*

- Developed a full-stack asset generator that enhances emotional expression in text messaging, bridging the gap created by digital communication by visually representing users' emotions

Technical Skills

Languages: Python, JavaScript (TypeScript), Java, HTML & CSS, SQL

Tools/Frameworks: React, AWS (DynamoDB, DocDB, Lambda, Cloudwatch) Node/Express (RESTful API's), MongoDB, Heroku, Git, Jira

Hobbies/Interests: Gaming, Aquarium & Terrarium making, Skiing, Golfing

Education

Computer Engineering at the **University of British Columbia** — Anticipated 2026

Relevant Courses: Algorithms & Data Structures, Software Testing and Analysis, Computer Architecture, Database and Design, Object Oriented Programming, Probability, Linear Algebra, Calculus, Pure Mathematics
